

Modular Door Stations

Our digital door stations feature a programmable display. The rolling display facilitates the search for the apartment number or name. They are equipped with an electronic data monitoring with automatic reset in case of electrical interference. The back lit display adapts to the ambient brightness.

Door stations are configured to your specifications. Recess door stations protrude by 16mm, surface 42mm.

FEATURES

- Fully modular, clear sound, variable volume, elegant design, impact resistant, weatherproof and tamperproof locking device.
